IntoPrint

IntoPrint is a print company you can rely on – we're as good as gold.

Wisdom, experience, reliability and personalised service have been the key to our success as a commercial printer on Sydney's Northern Beaches. Three ambitious tradesmen with a vast knowledge in all areas of print came together in 2001 to form this hands-on, client focused and now state-of-the-art print production facility. Our depth of knowledge has proved invaluable with the many services our clients require to meet the ever changing demands of print production; and especially in providing technical support and trouble shooting.

Most importantly, IntoPrint is a client driven print company, and as a client your service will be delivered by the very same Directors that melded their skills and passion to build a service you can rely on.

Services

Service is vital in a client driven company.

We understand the importance of delivering a service and a finished product of the very highest standard. Each time we print a job it's an investment in the future of our clients business as well as our own, and the quality of your print job says as much about us as it does about you.

Our services cover all the important things for your business – from prepress, printing, finishing through to mailing and warehousing.

- Business Cards & Stationery · Brochures · Booklets
- Digital short run · Books · Magazines · Postcards
- Pads · Cartons · Posters · Point of Sale Material
- Presentation Folders · Database Addressing
- Mailing Polybagging · Mail Sorting & Postage

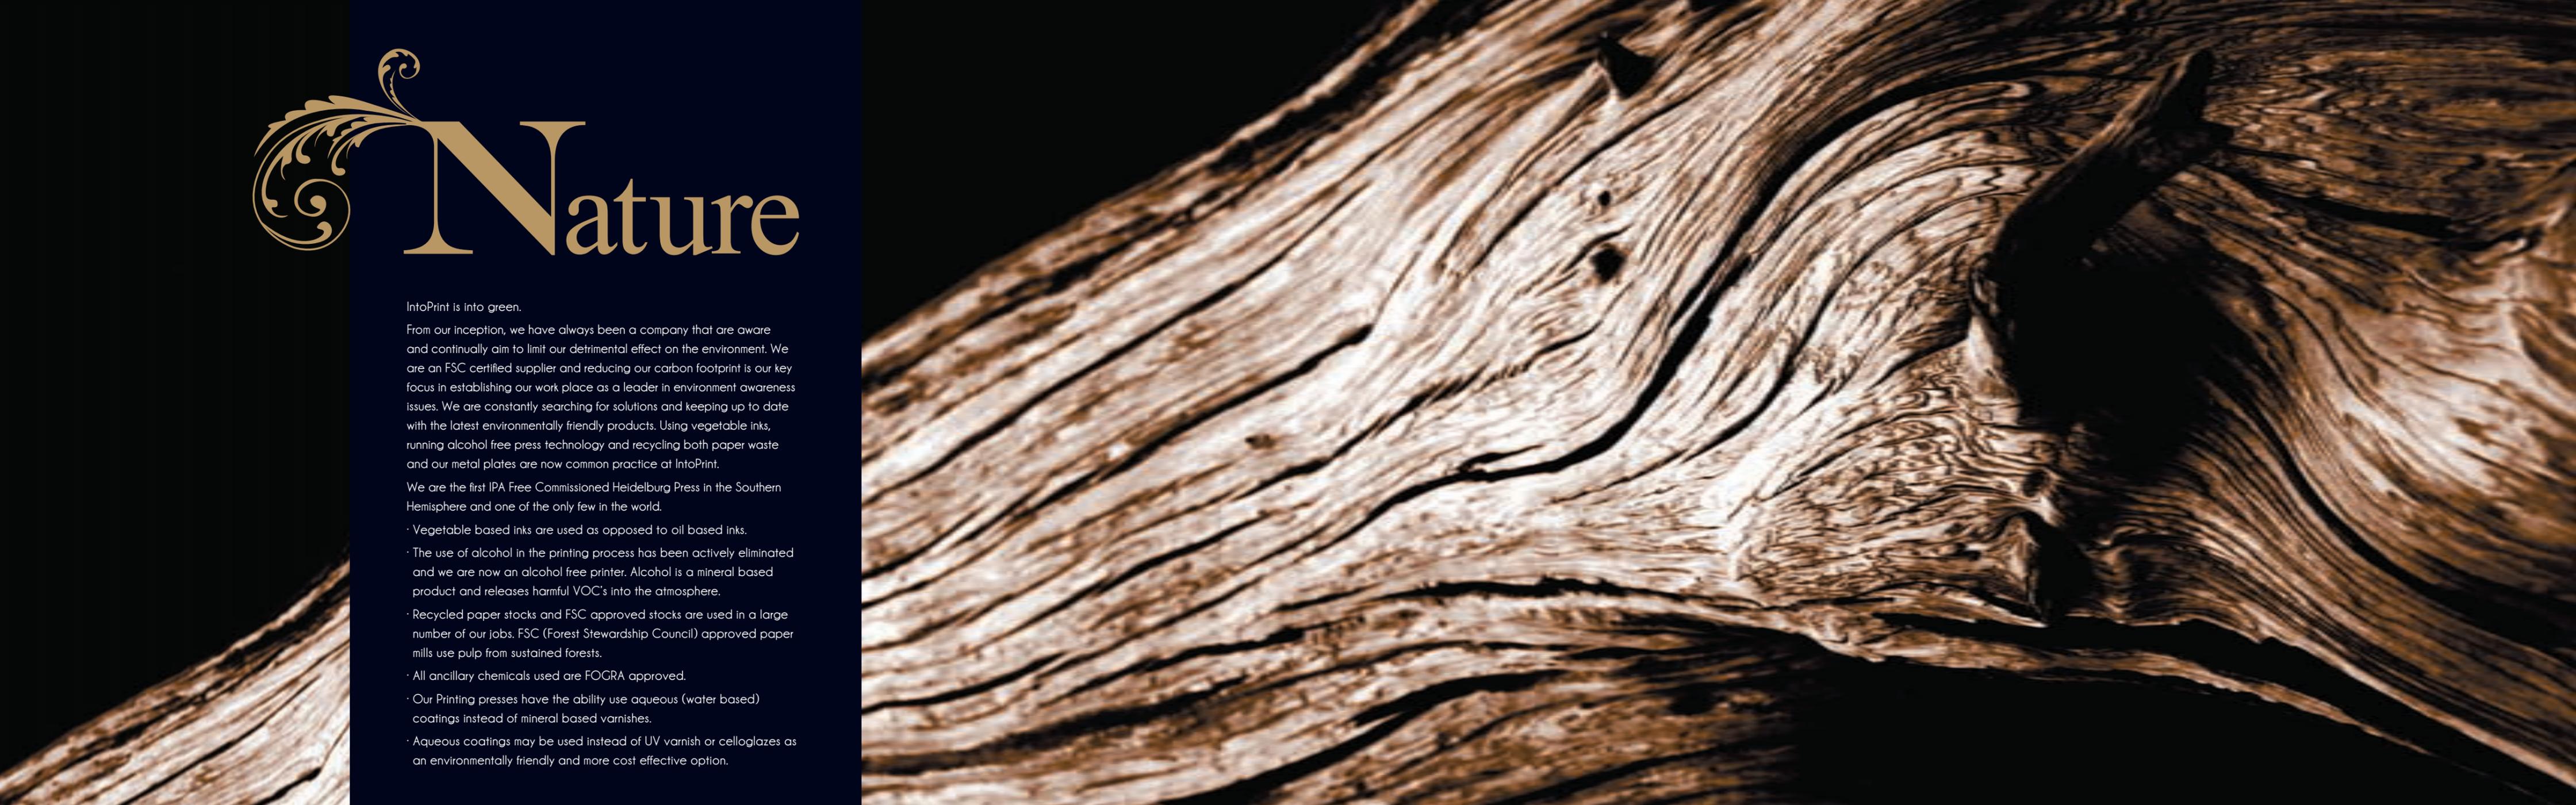

Technology

Improving print quality has always been our goal.

IntoPrint is now the largest independent A1 printer on the Northern Beaches with the acquisition of a Heidelberg CD 102 Five Colour plus aqueous coating press.

We are an FSC accredited printer, the new press is set up to run totally alcohol free, and we also run vegetable based, VOC free inks. Our prepress is fingerprinted right through from proofing, to the plates and the press, which then scans the printed sheets through the AXIS control system to ensure ISO colour standards. We offer standard screening, but offer amazing results with SPEKTRA SCREENING through our Thermal CTP Prepress unit. Finishing is done in-house which includes folding, saddle stitching with Stahl folders and a 6 station + Coverfeeder Muller Martini CST are all part of our technical capabilities, as well as drilling, shrink-wrapping, collating and other finishing equipment.

Nature

IntoPrint is into green.

From our inception, we have always been a company that are aware and continually aim to limit our detrimental effect on the environment. We are an FSC certified supplier and reducing our carbon footprint is our key focus in establishing our work place as a leader in environment awareness issues. We are constantly searching for solutions and keeping up to date with the latest environmentally friendly products. Using vegetable inks, running alcohol free press technology and recycling both paper waste and our metal plates are now common practice at IntoPrint.

We are the first IPA Free Commissioned Heidelberg Press in the Southern Hemisphere and one of the only few in the world.

- Vegetable based inks are used as opposed to oil based inks.
- The use of alcohol in the printing process has been actively eliminated and we are now an alcohol free printer. Alcohol is a mineral based product and releases harmful VOC's into the atmosphere.
- Recycled paper stocks and FSC approved stocks are used in a large number of our jobs. FSC (Forest Stewardship Council) approved paper mills use pulp from sustained forests.
- All ancillary chemicals used are FOGRA approved.
- Our Printing presses have the ability use aqueous (water based) coatings instead of mineral based varnishes.
- Aqueous coatings may be used instead of UV varnish or celloglazes as an environmentally friendly and more cost effective option.

Speed

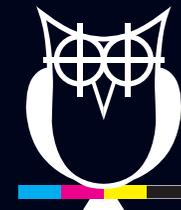

Today, time is more precious than ever.

That's why we offer a service that makes your print job work, no matter the time. We pride ourselves on fast, efficient and personalised service. Your job is treated with care and respect by us, and recognised as a crucial investment by you in the future of your business. With state-of-the-art printing facilities, we are able to cater for all your printing needs no matter where you are and we lead the way in introducing new technology to improve turnaround times and print quality. Our large print volume and press power ensures that you receive a competitive price and a super quick turn around.
